Dual Folding Technology:

With the all new 3G Cardio 80i Fold Flat™ Treadmill design, it is now possible to fold our treadmill flat and wheel it under a bed or shelf or simply through a doorway. While there are other folding treadmills on the market, none will match up in ease of use and overall quality. The 3G Cardio 80i Fold Flat™ Treadmill has an incredibly soft suspension and earns the award as the softest, best designed walking/running treadmill on the market today. [Did we mention it can fold up vertically and fold flat?](#)

A Runner's Treadmill:

Starting with a heavy duty 3.0 HP motor, nearly a 60" running surface and the stability of a treadmill twice its price, the 3G Cardio 80i Treadmill will impress even the stingiest of runners. With the capability of reaching 11mph maximum speed and an intense 15% maximum incline, this treadmill brings plenty of power and durability for maximum running potential.
